JAYANT SINHA TO INTRODUCE PRIVATE MEMBER BILL

Competition Bill likely to be passed in current session

LUX SARIN, MEMBER OF PARLIAMENT

The idea of this Private Member's Bill is to provide a legal framework for the government to regulate digital technologies. It is a very important and timely intervention in the digital landscape. The bill is expected to be passed in the current session.

CCI to set up in-house digital mkt data unit for regulating tech platforms

Jyoti Indrajit Bhatnagar, secretary of the CCI, emphasized on early intervention as a key to ensure that competitive landscape in digital markets is not distorted beyond repair.

Digital technologies sector should be assessed under CCI: MCA Secretary

While announcing a three week window period for public consultation on the proposed Competition (Amendment) Bill 2019, Ministry of Corporate Affairs (MCA) secretary Jyoti Sinhas said that sectors which are impacted by digital technologies should also be assessed under the Competition Commission of India (CCI).

Increased consumer trust spearheading growth of e-commerce in India

Over the past decade, India has witnessed a massive shift and a revolutionary change in the retail sector. Largely enabled by digitization and online shopping, the growth of e-commerce in India has been phenomenal. This is due to the fact that the major drivers of e-commerce are the growing internet penetration and the increasing trust of consumers in online transactions.

E-commerce's liability conundrum: Calls for greater collaboration between all stakeholders

The consumer protection law and the newly proposed rules for e-commerce under the act, as well as the jurisdiction in India, must provide clarity on the liability of each party in the e-commerce value chain.

Competition Commission of India squeezed by staff vacancies, workload

A void at the top rung of India's competition agency underscores a chronic resource crunch and is undermining its capacity to regulate major companies in the world's fifth-largest economy.

Inter-ministerial panel to ensure non-interference of three digital bills

The Digital India bill will focus on internet, security, trust, and accountability. It is a very important and timely intervention in the digital landscape. The bill is expected to be passed in the current session.

Retooling India's Digital Infrastructure to Truly Help the Poorest

Arvind Mayaram and Bhaavi Agrawal

The digital divide is a major challenge in India. The government needs to retool its digital infrastructure to ensure that the poorest are not left behind. This requires a focus on digital literacy, infrastructure, and regulatory framework.

Online dispute resolution platforms can ease case burden on courts

Online dispute resolution (ODR) platforms can help reduce the burden on courts by providing a faster and more efficient way to resolve disputes. This is particularly important in the context of the increasing number of cases filed in the courts.

Big Tech regulation: Blanket emulation of EU law may harm India's startups

Blanket emulation of EU law for Big Tech regulation may harm India's startups. The government needs to adopt a more nuanced approach that takes into account the specific needs and challenges of the Indian startup ecosystem.
