The “Competition and Regulation European Summer School and Conference” (CRESSE) is an international network of scholars and practitioners with a research or professional interest in Competition Policy and Network Industry Regulation. It was established in 2005, it is managed by the Athens University of Economics and Business and is organised in the first two weeks of July every year. The 8<sup>th</sup> Annual Summer School and Conference (CRESSE 2013) took place from 29<sup>th</sup> June to 12<sup>th</sup> July 2013, in Corfu island, Greece.

### What is the aim of the Summer School?

The aim of the CRESSE Summer School is to familiarise participants with the new economic literature, the recent legal developments and with the methods that are used to assess business practices in the context of Competition Law. Also to establish a clear link between the new theories and the day to day work of practitioners, enabling participants to face and answer difficult questions about the practical matters they come across in their work in an economically and legally informed manner.

### Who does it target?

The Summer School is designed for professionals working in *the wider areas of Competition Policy and Network Industry Regulation*, in:

- Competition Authorities and in Regulatory Bodies.
- Economic or Law Consultancies.
- Private and Public firms and organizations affected by interference in the form of sectoral regulation or antitrust and merger policies.
- Ministries or International Organizations.
- Postgraduate (and Doctoral) students specialising in Competition and Regulation.

The School provides a comprehensive account of the most up to date developments in economic theory, empirical analysis, legislation and policy in the areas of Competition and Regulation. Participants of the SS join a vibrant community of motivated students from all over the world and a distinguished international faculty.
